# EasyNet

What to expect from a net wrap with this name? Likely you expect that the work gets on smoothly and with maximum ease. In fact, this is EasyNet's promise: supporting the operator in baling work in the field by offering excellent coverage performance, strength, ease of cutting, lower environmental impact.

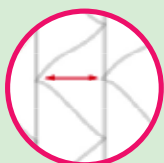

EasyNet is a latest-generation lightweight-net wrap and represents a significant qualitative increase for mid-range nets. EasyNet has a very high specific strength. It means that its chains are very strong despite they allow a reduction in the total amount of plastic. EasyNet: Novatex's contribution to easier farming.

|                    |             |
|--------------------|-------------|
| Length             | 3000 m      |
| Width              | 123 cm      |
| Max. roll diameter | 27 cm       |
| Average strength   | 265 kg      |
| Type of mesh       | medium mesh |

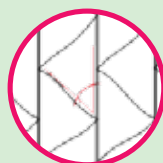

**► Medium sized mesh**

ME is a performing solution that allow to produce netwraps made of 37 chains with reinforced and thicker threads.

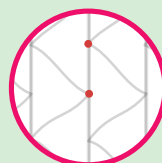

**► Higher Specific Strength**

Novatex's ME + technology gives the threads an incredibly superior Specific Strength. This means: perfect protection of the forage over time.

**► Better cling on the crops**

The ME+ Tech ensures optimal cling on the crops. Thanks to the wider angle of the weft, the ME netwraps hook up fast and easily.

**► Mesh with fewer knots**

Knots are the critical points of any thread. Novatex ME+ netwraps have half the number of knots with respect to standard netwraps.

**► Eco Friendly**

The proven increase in strength of Novatex ME + nets allowed a significant reduction in the use of plastic while maintaining the highest standards available.
